SUMMARY

Interdisciplinary quantitative researcher with 6+ years of experience in integrated environmental-economic modelling and environmental impact assessment of food systems. Extensive experience applying quantitative modelling approaches to explore mitigation options towards sustainable food systems. **Dissertation on assessing the impacts of food system transformation options (i.e., supply-side and demand-side measures, and environmental policies) at the macro level (i.e. regional, national, and global levels) using the integrated environmental-economic modelling approach based on the general equilibrium framework.** 10 scientific papers have been published in peer-reviewed journals, including two first-authored papers, one published in **Environmental Science & Technology (SCI Q1, IF=10.8)** and the other in **Sustainable Production and Consumption (SCI & SSCI Q1, IF=10.9)**, along with a co-authored paper in **Nature Food (SCI Q1, IF=23.6)**. Seeking academic opportunities for the 2024-2025 academic year.
